Executive Summary

The Need for New Judgeships in the Superior Courts: 2019 Update of the Judicial Needs Assessment, a report to the Legislature required by Government Code section 69614(c)(1), shows that 173 new judicial officers are needed based on workload. This analysis is based on judicial caseweights that were established in 2018. The mandated report also includes information about the conversion of additional subordinate judicial officers to fulfill the reporting requirement of Government Code section 69614(c)(3).

Relevant Previous Council Action

The methodology for determining the number of judgeships needed in the trial courts was approved by the Judicial Council in August 2001.¹ At that meeting, the Judicial Council also directed staff to assess statewide judicial need using workload standards developed by the National Center for State Courts. That initial needs assessment and priority ranking was approved by the Judicial Council at its October 2001 meeting.²

¹ Judicial Council of Cal., Research and Planning Unit, *A New Process for Assessing Judicial Needs in California* (Aug. 24, 2001), www.courts.ca.gov/documents/judneedsreview.pdf.

² Judicial Council of Cal., Research and Planning Unit, *Results of Statewide Assessment of Judicial Needs Including List of Recommended New Judgeships* (Oct. 26, 2001), www.courts.ca.gov/documents/stateassess.pdf.

At its August 2004 meeting, the council approved technical modifications to the judicial workload methodology and modified the priority ranking of the new judgeships.³ At its February 2007 meeting, after the state Legislature created 50 new judgeships,⁴ the council approved a subsequent reranking of the remaining 100 top-priority judgeships to reflect changes in workload since the 2004 report. The council also approved the methodology for identifying the number and location of subordinate judicial officer (SJO) positions that should be converted to judgeships.

In October 2007, Assembly Bill 159 (Stats. 2007, ch. 722) was enacted, authorizing 50 additional new judgeships; all but two had remained unfunded and unfilled until 2019. The 2019 Budget Act authorized and funded 25 new trial court judgeships. AB 159 also authorized the conversion of 162 vacant SJO positions—identified according to the council-approved methodology—at a rate of no more than 16 per year. Assembly Bill 2763 (Stats. 2010, ch. 690) authorized 10 additional conversions per year, if the conversions were to result in judges being assigned to family or juvenile law calendars previously presided over by SJOs.

Updates of the assessed judicial need were approved by the Judicial Council, as directed by statute, in 2008, 2010, 2012, 2014, and 2016.⁵ A preliminary update was approved in 2018.

The council has made a few revisions to the methodology used to calculate judicial need. In December 2011, the council approved updated caseweights that measure the amount of time that judicial officers need for case processing work.⁶ At its December 2013 meeting, the council adopted a recommendation that any judgeships approved and funded be based on the most recent judicial needs assessment approved by the council.⁷ And in December 2014 the council adopted a revision to the prioritization method used to allocate any new judgeships. The revision lowers the initial qualifying threshold from 1.0 full-time equivalent (FTE) position to 0.8 FTE so that courts with fewer judicial officers have a greater opportunity to become eligible for new judgeships.⁸

³ Judicial Council of Cal., Office of Court Research, *Update of Judicial Needs Study* (Aug. 9, 2004), www.courts.ca.gov/documents/0804item6.pdf.

⁴ In September 2006, Senate Bill 56 was enacted (Stats. 2006, ch. 390), authorizing 50 new judgeships; funding in fiscal year (FY) 2006–07 was provided for one month and ongoing thereafter.

⁵ Assessed judicial need updates are available at www.courts.ca.gov/documents/100808item1.pdf (2008), www.courts.ca.gov/documents/20101029infojudge.pdf (2010), www.courts.ca.gov/documents/jc-20121026-item2.pdf (2012), www.courts.ca.gov/documents/jc-20141212-itemT.pdf (2014), and www.courts.ca.gov/documents/jc-20161028-16-161.pdf (2016).

Analysis/Rationale

Government Code section 69614(c)(1) requires that the judicial needs assessment be updated biennially in even-numbered years. Because an update to the Judicial Workload Study model parameters was being completed in 2018, a preliminary 2018 Judicial Needs Assessment was submitted. The 2019 Judicial Needs Assessment, which reports on the filings-based need for judicial officers in the trial courts, shows that 173 FTE judicial officers are needed in 19 courts (see table 2 in Attachment A).⁹

The California Budget Act of 2019 authorized and funded 25 new trial court judgeships. The determination of which courts are to receive judgeships is based on the Judicial Council's prioritization and ranking methodology. The methodology first identifies the number of judgeships needed in each court by comparing the number of authorized judicial positions to the most recent judicial needs assessment. Any court needing at least 0.8 FTE of a judgeship becomes eligible per the council policy adopted in December 2014. Next, a prioritization method that accounts for both the absolute and the relative need of a court is applied to determine the order in which each judgeship needed in each court should be allocated. Courts that need more than one new judgeship to meet workload-based need will appear multiple times on the list until all positions have been allocated.

Fiscal Impact and Policy Implications

There are no costs to the branch associated with production of this report, other than the staff time needed to prepare the report and analyses. The funding associated with any new judgeships that may be authorized for the judicial branch as a result of this analysis is incorporated into the budget change proposals and/or the legislation that is sponsored to request new judgeships.

This report is an update to *The Need for New Judgeships in the Superior Courts: Preliminary 2018 Update of the Judicial Needs Assessment*. It is based on new workload measures that were developed from the 2018 Judicial Workload Study, which was in progress when the preliminary 2018 report was published. The new measures were approved by the Judicial Council at its meeting on September 24, 2019.

Access to Justice Requires Having Sufficient Judicial Resources

Government Code section 69614(c)(1) requires the Judicial Council to report to the Legislature and the Governor on or before November 1 of every even-numbered year on the need for new judgeships in each superior court, using the uniform criteria for the allocation of judgeships described in Government Code section 69614(b). Government Code section 69614(c)(3) requires the Judicial Council to report on the status of the conversion of additional subordinate judicial officer (SJO) positions to family or juvenile assignments.

The public's right to timely access to justice is contingent on having adequate judicial resources in every jurisdiction. The number of judgeships authorized and funded by the Legislature has not kept pace with workload in all California trial courts, leaving some with serious shortfalls—as high as 57 percent—between the number of judgeships needed and the number that have been authorized and filled.

Securing resources to meet the workload-based need for new judgeships has been a top priority for the Judicial Council for many years.

Quantifying the Need for New Judgeships in the Superior Courts

California is a pioneer in the measurement of judicial workload-based need, having been the first state to use a weighted caseload methodology to assess the need for judicial officers, beginning in 1963.¹ Since then, weighted caseload has become a nationally accepted methodology for measuring judicial workload. The current methodology used to assess the need for judicial officers in the superior courts is based on a time study conducted in 2018, in which over 900 judicial officers in 19 courts participated. The time study findings resulted in the development of a set of caseweights that quantify the amount of case processing time needed for different case types, taking into account the full range of possible case processing outcomes and their relative probability of occurrence. The caseweights that resulted from the 2018 time study were approved by the Judicial Council in September 2019.

The caseweights are used to estimate judicial officer need by multiplying each caseweight by a three-year rolling average of filings for that case type and dividing by the available time in minutes that judicial officers have to hear cases. The result is expressed in full-time equivalent (FTE) judicial positions.

¹ Harry O. Lawson and Barbara J. Gletne, *Workload Measures in the Court* (National Center for State Courts, 1980).

Judicial Workload Measures Must be Updated to Reflect Current Case Processing Need

Periodically, the workload measures that are used to assess workload need must be updated to reflect changes in the law, technology, or case processing practices. The updated caseweights approved by the Judicial Council reflect typical case processing times based on the most recent workload study period and reflect recent changes to judicial workload resulting from legislative and other policy changes that occurred up through the study period.

Such changes may also affect the practices of the court's justice partners, which can, in turn, affect court workload. Although filings have been declining, the workload associated with some types of filings has increased—because of, for example, the need to hold more hearings and the increased complexity of cases coming before the court (e.g., increasing mental health and substance abuse issues, as well as larger numbers of defendants with multiple cases). On the other hand, judicial workload in other areas not affected by such law and policy changes may have declined. The net impact of workload increases v. decreases may vary by jurisdiction depending on each court's unique mix of cases.

2019 Statewide Judicial Need Shows a Critical Need for New Judgeships

The 2019 Judicial Needs Assessment shows a shortage of judges relative to the workload needs in California's trial courts. Table 1, which summarizes the statewide judicial need compared to available resources based on a three-year average of filings, from fiscal years 2015–16 through 2017–18, shows that 1,975.5 FTE judicial officers are needed statewide.

Table 1 shows that the total assessed need for judicial officers based on current workload measures is 1,976 FTE. The Preliminary 2018 Update of the Judicial Needs Assessment findings are also shown. Differences between the Preliminary 2018 Update and the 2019 Update are based in part on changes to the workload measures and in part on updated filings data. The needs assessment is always based on the three most recent years of filings data available—at the time of the Preliminary 2018 Update, fiscal years 2014–15 through 2016–17. The 2019 Update is based on filings from fiscal years 2015–16 through 2017–18. Using the most recent filings data available ensures that the workload assessment is based on the most current data available.

Table 1. Statewide Need for Judicial Officers, 2018 (preliminary) and 2019 Judicial Needs Assessments

Year	Authorized Judicial Positions (AJP)*	Authorized and Funded Judgeships and Authorized SJO Positions	Assessed Judicial Need (AJN)
2018[†] (preliminary)	2,004.1	1,956.1	1,929.9
2019	2,004.1	1,956.1	1,975.5

* Includes the 48 judgeships that were authorized by Assembly Bill 159 (Stats. 2007, ch. 722) but never funded or filled. AB 159 originally authorized 50 judgeships, and 2 were funded in 2018 and allocated to the Superior Court of Riverside County. See Stats. 2018, ch. 45, § 6.

Does not include the 25 judgeships authorized and funded by the 2019 Budget Act.

[†] Preliminary 2018 Update of the Judicial Needs Assessment.

173 Judicial Officers Needed Statewide to Meet Workload Demand

Judicial need is calculated by taking the difference between the assessed judicial need in each court and the number of authorized/funded positions in each court (shown in Appendix A). Calculating the *statewide* need for judgeships is not as simple as subtracting the statewide number of authorized and funded positions from the statewide assessed judicial need: the net statewide calculations of judicial need do not accurately identify the court’s need for new judgeships because judgeships are not allocated at the statewide level but are allocated to individual trial courts.

By way of illustration, the branch’s smallest courts are statutorily provided with a minimum of two judgeships and are authorized to have at least 0.3 FTE of a federally funded child support commissioner, for a total of 2.3 FTE judicial officers. This statutory minimum applies even though the workload need in those courts may translate to a much smaller number of judge FTEs. As Appendix A shows, under a pure workload analysis, two of California’s two-judge courts—Alpine and Sierra Counties—would need only 0.1 and 0.2 FTE judicial officers, respectively, but have 2.3 FTE authorized positions. These courts thus show a negative number in the need for new judicial officers. This negative number does not and should not offset the 37 judicial officers that Riverside County needs to meet its workload-based need.

The actual statewide need for new judgeships is calculated by adding the judicial need among only the courts that have fewer judgeships than their workload demands. Judicial officer FTE need—the difference between the assessed judicial need and the authorized judicial positions—is rounded down to the nearest whole number to arrive at the number of judgeships needed for each court.² For example, Tulare County has a judicial officer FTE need of 4.7, which rounds down to 4 new judgeships.

² Per the Judicial Council policy adopted in 2014, an exception is made for courts with judicial FTE need of more than 0.8, but less than 1.0. For such courts, their actual judicial officer FTE need is reported without any rounding down. In 2018, there were no courts with judicial officer FTEs in the range of 0.8–1.0. See Judicial Council of Cal., Advisory Com. Rep., *Judicial Workload Assessment: 2014 Update of Judicial Needs Assessment and Proposed*

Based on the 2019 Update of the Judicial Needs Assessment, 19 courts need new judgeships, for a total need of 173 judges (Table 2). A map illustrating judge need is shown in Appendix B. The need estimate does not include judicial vacancies resulting from retirements, elevations, or other changes that have not yet been filled.³

Revision to Methodology Used to Prioritize New Judgeships (Nov. 7, 2014), www.courts.ca.gov/documents/jc-20141212-itemT.pdf.

³ Judicial vacancies are reported monthly at www.courts.ca.gov/15893.htm.

Prioritization of New Judgeships

The California Budget Act of 2019 authorized and funded 25 new trial court judgeships upon adoption of the Judicial Council’s Judicial Needs Assessment.⁴ Table 3 lists the twelve trial courts that will be receiving the 25 new judgeships.

The determination of which courts are to receive judgeships is based on the Judicial Council’s prioritization and ranking methodology, which considers courts with the greatest need relative to the current complement of judicial officers and the goal to improve access to courts for the greatest number of users.⁵ The methodology was first approved by the Judicial Council in 2001 and is codified in Government Code section 69614(b). Appendix C lists the allocation order for each of the 173 judgeships needed in the California trial courts.

Status of Conversion of Additional SJO Positions to Family and Juvenile Assignments

As directed by Government Code section 69614(c)(3), this report also addresses the implementation of conversions of additional SJO positions (above the 16 authorized per year) that result in judges being posted to family or juvenile assignments previously held by SJOs.⁶

Conversions of additional positions were authorized for fiscal year 2011–12 (Gov. Code, § 69616), and under this authority 4 SJO positions were converted to judgeships—1 each in the

⁴ Dept. of Finance, *California Budget 2019–20*, Summary: Judicial Branch, www.ebudget.ca.gov/2019-20/pdf/Enacted/BudgetSummary/JudicialBranch.pdf (as of Oct. 9, 2019).

⁵ Judicial Council of Cal., Staff Rep., *Results of statewide assessment of judicial needs including list of recommended new judgeships* (Oct. 26, 2001), www.courts.ca.gov/documents/stateassess.pdf.

⁶ As authorized by Gov. Code, § 69615(c)(1)(C).

superior courts of Alameda (June 2012), Los Angeles (Jan. 2012), Orange (Jan. 2012), and Sacramento (Mar. 2012) Counties. The courts that converted those positions have confirmed that those family and juvenile calendars are now presided over by judges.

Conversions of 10 additional positions had been authorized for each fiscal year from 2013–14 through 2017–18 (Gov. Code, §§ 69617–69619.6, respectively), but no additional SJO positions above the 16 authorized per year were converted under this authority.

Lack of Adequate Judicial Resources Is a Barrier to Access to Justice

The public’s right to timely access to justice should not be contingent on the resource levels in the county in which they reside or bring their legal disputes. All Californians deserve to have the proper number of judicial officers for the workload in their jurisdiction. This report highlights the critical and ongoing need for new judgeships in the superior courts.

* Authorized judicial positions (AJP) include both judgeships and subordinate judicial officer positions. Authorized judgeships consist of those codified in Government Code sections 69580–69611 plus the 50 judgeships that were authorized and funded by Senate Bill 56 (Stats. 2006, ch. 390), but not the 48 judgeships that were authorized with AB 159 but never funded. The authorized judicial positions also do not include the 25 judgeships authorized and funded in California Budget Act of 2019.

† Percentages in Appendix A differ slightly from those in table 2, Need for New Judgeships, by Court. Percentages in Appendix A are calculated based on the *actual* differences between AJN and AJP, whereas the percentages in table 2 are based on *rounded-down* differences between AJN and AJP, as explained on pages 3.
