Title

Judicial Branch Administration: Judicial Branch Statistical Information System (JBSIS) Data Quality Control Standards (Action Required)

Summary

The Court Executives Advisory Committee recommends that the Judicial Council adopt policy guidelines for courts reporting aggregated statistical information to the Judicial Branch Statistical Information System (JBSIS). JBSIS is the statistical reporting system that defines and electronically collects summary information from superior court case management systems for each major case processing area of the court. The recommendation will institute protocols for data amendments for courts that encounter errors in data reporting and will establish a mechanism for courts to share best practices for data quality controls. This recommendation is intended to improve confidence in and the consistency of JBSIS data reporting. If approved, the policy will become part of the updated JBSIS manual, which has been submitted for council adoption in a separate proposal.

Recommendation

The Court Executives Advisory Committee (CEAC) recommends that the Judicial Council, effective May 17, 2019, adopt the proposed policy guidelines for data quality control for courts reporting statistical information to the Judicial Branch Statistical Information System.

Speakers

Mr. Jake Chatters, Chair, JBSIS Subcommittee, Court Executives Advisory Committee (by phone)
Ms. Leah Rose-Goodwin, Office of Court Research
Ms. Emily Chirk, Office of Court Research
